

AFTER YOU PAINT

Light Bulbs Links

Below are some helpful links as well as an additional activity if you would like to explore light bulb options.

BULB SHAPE CHARTS:

<https://www.bulbs.com/learning/shapesandsizes.aspx>

<https://www.bulbs.com/learning/basechart.aspx>

SITE TO EXPLORE

If you would like to test your knowledge and see what light bulbs are available, click on the following site:

<https://www.1000bulbs.com/category/light-bulbs>

In the filters on the left, select 100% CRI (scroll down to see it) and look over your results. Notice you only have incandescent and halogen bulbs to choose from. Back up and click on High CRI (90 and above) instead. Now you have other choices. Click on LED in your filter and then browse your choices. Notice most have 90 CRI. Trust me...that's not high enough. You need to find a CRI of 95 or higher. You can type "CRI 95 LED" in the search to see better results.
